Rinesa Muharremi

QA Engineer | Prishtina, Kosovo | rinesa.muharremi00@gmail.com | +383 49 11 22 55 | linkedin.com/in/rinesa-muharremi

Professional Summary

QA Engineer with hands-on experience in manual testing of web and mobile applications at Ptera.tech. Designs test cases from user stories and acceptance criteria, executes functional, regression and usability testing, and writes clear, reproducible bug reports in Jira. Tests complex end-to-end flows such as task and event creation, real-time messaging, notifications, wallet features, location-based functionality and online/offline behavior, with a strong focus on edge cases. A Computer Engineering degree and full-stack development background (Angular, Java, C#) support precise defect isolation and effective collaboration with developers.

Technical Skills

- **Testing:** Manual Testing, Functional Testing, Regression Testing, Retesting / Fix Verification, End-to-End Testing, Exploratory Testing, UI/UX & Usability Testing, Edge Case & Boundary Testing, Web & Mobile Application Testing, Pre-release Validation
- **QA Process:** Test Case Design, Test Scenarios, Requirements Analysis (User Stories, Acceptance Criteria), Bug Reporting & Tracking, Defect Lifecycle, SDLC
- **Tools:** Jira, Git, GitHub, Bitbucket, Slack, Microsoft Teams, Discord
- **Security:** Burp Suite, Kali Linux (academic web application analysis)
- **Programming & Web:** Java, C#, Python, C++, PHP, JavaScript, HTML, CSS, jQuery, Angular, Bootstrap
- **Databases:** MySQL

Work Experience

Quality Assurance Engineer | Ptera.tech | Jan 2026 – Present

- Perform manual functional, UI and usability testing of web and mobile applications across Ptera's projects.

- Design and execute test cases and test scenarios from user stories, acceptance criteria and functional specifications, covering positive, negative, edge-case and boundary conditions.
- Test complex end-to-end user flows, including task and event creation, real-time messaging, notifications, groups, wallet features, user profiles, attachments, location-based functionality and online/offline behavior.
- Report and track defects in Jira using a structured template (bug type, environment, preconditions, steps to reproduce, expected vs. actual results, attachments) to support fast reproduction and resolution.
- Verify bug fixes and run regression testing after each update to confirm issues are resolved and existing functionality is not affected.
- Collaborate with developers and product stakeholders to clarify requirements, discuss defects and raise UX improvement observations.
- Improve QA practices by introducing structured testing approaches, edge-case coverage and usability checks.
- Support pre-launch validation of core features to confirm stability and production readiness.

Technology Trainer | Sheikha Fatima Bint Mubarak Women's Foundation | Nov 2024 – Apr 2026

- Delivered computer literacy training for women, covering Microsoft Office (Word, Excel, PowerPoint, Outlook) and introductory programming concepts.
- Designed interactive lesson plans adapted to different learning styles and guided learners in applying skills to real-world tasks.

Full Stack Developer Intern | QuadA | Jul 2024 – Oct 2024

- Developed responsive front-end components in Angular and back-end services in Java for a healthcare quality and safety software platform.
- Implemented user authentication, form validation and automated email services.
- Worked with product, design and QA teams to deliver new features and resolve critical bugs.

Substitute ICT Teacher | High School of Economics and Law "Hivzi Sylejmani" | Nov 2020 – Dec 2020

- Taught Information and Communication Technology to high school students using curriculum-aligned lesson plans.

Independent Bug Discovery

Self-initiated exploratory testing of public web and mobile apps, with each defect reported to the vendor including steps to reproduce, expected vs. actual results, severity and screen recordings.

- **GjirafaMall (E-commerce):** reported two UI defects: product prices overlapping other elements in the "Oferta speciale" section (confirmed and fixed by the team), and duplicate stock notifications stacking over the "Go to Cart" button, blocking a primary purchase action.
- **Instagram (Mobile):** reported a navigation defect where search result screens stack and partially overlap when moving back through previous searches, instead of a single results view updating.
- **LinkedIn (Web):** reported a navigation layout defect where the Home icon shifts position on the People search results page, with reproduction steps and a screen recording.
- **TikTok (Mobile):** reported a state-refresh defect where a video's follow status does not update after switching accounts, showing incorrect account-specific data.
- **Snapchat (Mobile):** reported a navigation defect where replying to a Memory from a chat redirects the user to the main Chats list.

Projects

- **Web Application Security Analysis** (Burp Suite, Kali Linux): analyzed a web application for security weaknesses using Burp Suite.
- **Password Management & Authentication with Digital Signatures** (Java)
- **Client/Server Communication Protocol** (Python)
- **Social Network Management Database** (MySQL)
- **BFS and DFS Algorithm Visualization Web App** (Vanilla JavaScript)
- **Kids Learning Android App** (Java) and **E-commerce Site for Tech Products** (PHP)

Education

Bachelor of Computer Engineering | Faculty of Electrical and Computer Engineering, University of Prishtina "Hasan Prishtina" | Prishtina, Kosovo

Certifications

- Python Programming | Innovation Center Kosovo
- Front-End Web Development | Cacttus Education
- Front-End Web Development | Beetroot Academy

Languages

Albanian (Native) · English (C1) · German (A2)
